Interessanter Fotoguide fr Besucher von Sao Miguel (Azoren)Von KundeWertvolle Untersttzung wo es auf der Insel besonders interessante Fotomotive gibt und weitere Rahmenbedingungen (z.B. KurzbeschreibungAzores archipelago is located 3000 km of the coast of Europe in the middle of the Atlantic Ocean. It takes 2 hours long flight to get there from Europe and 4 hours to fly from Northern America. This is a kind of the forgotten land. The Azores are about the untouched beauty, nature, peace and difficult to find these days tranquility.I

have spent many mornings and evenings photographing So Miguel island coastline, and in this book I share my favorite locations, some of which would be extremely difficult to locate without assistance. Azores is photographers paradise because of rapid changing weather and perfect photographic conditions even in the middle of the day. The people of the archipelago use to say that every day one can experience 4 seasons: from 25C sunny moments to nearly 0C. The wind, clouds and wave action are continually in flux. This guide is intended for tourists and photographers of all skill levels, starting from curious tourists throughout intermediate photographers up to professionals. The guide might be a perfect solution for people who are unfamiliar with the area and who want to achieve as much as possible during the limited time they spend on the islands. There are GPS coordinates for all locations, paragraphs with Best Time to Go, How to Get There, Best Light and Tips. There are maps to save your time while looking for the spot. This guide shows the 30 best photographic locations on the main island of the Azores Archipelago: So Miguel.
