KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Delightful for young and old and even non-English speakersVon Andrea SchmitzThis book is fantastic!I'm a mother of 6 and married to an artsy kind of guy and we all love it! Even though we live in Germany and my kids have German

friends, this book was so delightful that I went and ordered an extra three copies. Here's why: Anyone, any age and any level of artistic skill can immediately "get" the book. And of course we are convinced that even our little German friends will easily get the concepts behind the book. As a family, we actually work through our book and then chat about the world map about where the various buildings are in the world and discuss if anyone has come across the places in the book before (in person? via literature? penpal?). Only one question remains open after blitzing through this book: When do we expect a new book from A.S. House?
