Interesting for world and arm-chair travelers alikeVon Ein KundeThis book tells how people not only dream of

different lives, but live them. You too can share their joys as well as their misadventures. Visit with them and enjoy the tales of the famous and not so famous visitors they have entertained. How can you make a living when you had nothing to start with. This not a "how to" book but shows what can be done when you set your mind and heart to the task. Mostly the characters have raised above the crowd in their likes, desires, and true life experiences. Reviewed by Dave and Connie Pryor.0 von 0 Kunden fanden die folgende Rezension hilfreich. A fascinating and factual book about adventurous peopleVon Ein KundeIn this book, Stephens introduces the reader to some of the fascinating expatriate men and women he has come to know over the years. The stories are biographies of action photographers, artists, philosophers, entrepreneurs, sailors, environmentalists, and others, and are as varied and alluring as Southeast Asia itself. A word of caution: those who are dissatisfied with their present lives or occupations may be influenced by these characters and run off to distant lands seeking adventure or their own fortune
