Von Dr. Bon Blossman : From GED to PhD: The Autobiography of Dr. Bon Blossman (English Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised From GED to PhD: The Autobiography of Dr. Bon Blossman (English Edition):

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Bonnie, Bonnie, BonnieVon JanineDie Autobiografie von Bonnie Blossmann "From GED to PhD" ist fr alle Big-Rich-Texas-Freunde ein absolutes Muss. Tagebuchhlich beschreibt Bonnie ihr Leben in 27 Kapiteln, welche jeweils mit einem kleinen Fazit bzw. einem Hinweis fr das eigene Leben abschlieen. Hier wird die Geschichte einer Schulabbrecherin und Teen-Mom erzhlt, die mit 17 Jahren heiratete um sich drei Jahre spter scheiden zu lassen, die schlielich ber viele Umwege und Schwierigkeiten hinweg eine wissenschaftliche Karriere anstrebte und promovierte. Aktuell hat sie eine

auerordentliche Professur an der University of North Texas inne. Der Schreibstil ist zugegeben amerikanisch naiv aber er ist gleichzeitig sehr "Bonnie", also sehr authentisch. Im Groen und Ganzen kein Meisterwerk aber doch ein hbsches kleines motivierendes Buch, dessen Lektre man nicht bereut.

Kurzbeschreibung Dr. Bon Blossman was an average American child from an affluent family in Westover Hills, Texas. As she entered high school, Bons experimentation with cigarettes, drugs and alcohol morphed her from an honor student to a class clown, void of ambition. At the end of ninth grade, she relocated to a town that didn't welcome her. Bon's lifelong struggles with a dangerous eating disorder commenced when long time friendships were lost and high school bullies made her life a living hell. After living in a German village for a year, Bon dropped out of high school as a pregnant teenager. She was married at seventeen years old, but before her twentieth birthday, she was divorced. As a single parent, Dr. Bon Blossman turned around her academic failures and entered the arduous journey of what ended up being ten years of higher education. With multiple honors along the way, she eventually earned a Bachelor of Science in pre-medicine, a Master's degree in Microbiology and a PhD in physiology with a 4.0 GPA where her dissertation research was noted as a landmark project in metabolic allometry. Dr. Bon completed a two-year post-doctoral fellowship researching developmental cardiovascular physiology. She currently serves as an ad hoc reviewer for the National Science Foundation and the Royal Integrative Society. Dr. Blossman is an adjunct professor at The University of North Texas and has seventeen years of college teaching experience. Dr. Bons primary focus is her writing career. She is an accomplished author of four novels with many more to come. She is the CEO and founder of the #1 murder mystery game company, MyMysteryParty. She also founded Zakkem Publishing, a start up online publishing company that publishes and markets music media and books. Dr. Bon has created a claymation for a Mountain Dew commercial, is a published recording artist with Party of 2, plays bass guitar for an alternative rock band with her family, and currently stars on a reality television show. In addition to her anti-bullying campaign to promote awareness and equality, Dr. Bon has plans to break into acting as well as developing the Fiona Frost Franchise and to create a science-inspired tutorial show.
