KurzbeschreibungThere were times when I avoided parachuting out of respect for the ecosystem, for it would have been such a shame that a meteorite like me to destroy a species such as that of dinosaurs.Basically this is my story. A diary amusing for everyone, whether you are advertising for socks or finding yourself in this desperate situation (please, do not cut your veins, better let them long).Whether I found a solution before causing a shift of the tectonic plates? Yes, I succeeded. It can be also your solution or you can adapt it in your own way to an aholic-problem.KurzbeschreibungThere were times when I avoided parachuting out of respect for the ecosystem, for it would have been such a shame that a meteorite like me to destroy a species such as that of dinosaurs.Basically this is my story.
