Capstick on tpoics besides big gameVon Ein KundeThe diary of a hunt for fire breathing dragon (complete with references to the appropriate hard to get license, season, gear and limited hunting area) in the last chapter is worth the price of the

book for anyone who loves Capstick's writing. Other chapters deal with Air rifles, fishing, rat hunting in New Jersey, et al. This is not as chock full of big game excitement as Capstick's other works. But over all still a good read.0 von 0 Kunden fanden die folgende Rezension hilfreich. "Better than the movies, this is the real deal first hand." Von Ein KundeCapstick provides a glimpse into a world most of us will ever know! He shares his daily events of which sometimes seem unreal. Africa has deservedly earned its reputation of one of the most dangerous of continents...even for those who have hunted it's creatures for 40 years! Highly recommended for hunters, shooters, or any animal rights activist who believe these are defenseless animals.

KurzbeschreibungPeter Hathaway Capstick first earned a name as an outdoor writer in the pages of such magazines as Guns Ammo, Petersen's Hunting, The American Hunter, and Outdoor Life. In this, the first of a two-volume collection of his hunting, fishing, and shooting tales, you'll find twenty-four examples of his keen eye and steady hand with rifle, shotgun, bow, and typewriter. The critically acclaimed successor to Hemingway and Robert Ruark repeatedly put himself in harm's way and writes about close scrapes with his trademark wit and dash. He tells what it's like to be in the path of an express train with Horns--the Cape buffalo; describes the heart-stopping sensation of sharing the immediate bush with several sickle-clawed lions that most certainly were prone to argue; and recounts his adventures bow-fishing for exotic species in the piranha-filled rivers of Brazil. Capstick's experiences, painfully gained (and almost lost) with the most dangerous of game, are the yardsticks against which most modern exotic and hunting adventures are gauged. The finely rendered drawings by Dino Paravano do justice to the text. Pressestimmen "This volume ... will be welcomed warmly by sportsmen and -women, safari buffs and vicarious adventurers."
