My second "Bible."Von BaciagaluppoOf all the books about educating children with learning disabilities, this is my favorite. It is written from a Christian perspective, so it may not be for everybody. However, Herzog has many years of experience, practical suggestions, and she puts all of the jargon and psychobabble in the proper perspective.My

favorite section of the book is where she lists the qualities and characteristics many LD children have -- the POSITIVE qualities, as well as the problem areas. This is the whole key to having the proper attitude towards these children, and teaching them effectively. Herzog also points out that school is but one aspect of any person's life, and it is TEMPORARY. She gives many specific examples of people who did miserably in school, but had very successful lives anyway. An extremely helpful and welcome book.
