Brilliant reading.Von Michael J WoznickiLizzie Borden took an axe and gave her mother 40 whacks, when she found what she done, she gave her father 41 - or did she? What if Lizzie Borden wasn't the killer, then who did it? William Masterton

thinks it was someone else and his books may just have the answers. Fall River, Massachusetts is the location of one of America's most brutal murders. In 1892 Lizzie Borden was acquitted of the crime, but over 100 years later people still consider her the killer. Masterton pieces together, through forensics, a highly convincing argument to the contrary of public opinion. The book looks at the evidence gathered, breaks it down and details why Lizzie Borden could not and was not the killer. I was a skeptic of the book until I started to openly evaluate what the author was relaying throughout the entire book. Masterton had to have worked overtime to answer the most difficult questions. His work is impeccable and his research is by far the best I have ever seen on this subject. This book Masterton has changed my thinking on the case - you might want to read this one too.

Kurzbeschreibung On August 4, 1892, an elderly couple living in Fall River, Massachusetts, was slaughtered with a hatchet. Their daughter, Lizzie Borden, was first accused of the crime, then tried for it, and acquitted of it by a court of her peers. Yet, conventional wisdom and Fall River Society have always considered Lizzie guilty. If Lizzie didn't swing the hatchet, who did? they asked blamefully. Now, after more than a century, the late University of Connecticut full Professor, William Masterton, uses modern forensic and extensive research to answer that question convincingly. Lizzie Borden took an axe and gave her mother forty whacks; When she saw what she had done she gave her father forty one. The rhythm and rhyme of the refrain may be defective; the conclusion, that Lizzie Borden may have been the killer, is not!
