Kundenrezensionen Hilfreichste Kundenrezensionen 0 von 0 Kunden fanden die folgende Rezension hilfreich. A helpful, if brief, look at some of the objections to Christianity and some possible responses Von Helen Hancox This is a

thorough revision of the book first published in 1986 and it is updated with large numbers of modern references - The Da Vinci Code, Hurricane Katrina, Britney Spears. The book sets out the case for Christianity whilst exploring potential objections about the church, science, the Bible, suffering, Jesus and proof. It's easy to read with lots of helpful quotations but by necessity in a 200 page book it doesn't delve all that deeply into any of the subjects. Although argued well, I am dubious that it would convert any atheists or agnostics - I suspect it's most helpful as a tool for Christians to be able to "give reasons for the hope that is in you".

**Kurzbeschreibung** This is a completely revised and updated edition of a best-selling classic (previously published as *The Case Against Christ*) to help those who want to understand the strong reasons for holding the Christian faith in today's world. John Young offers a jargon-free and highly readable exploration of what Christians believe and why - and includes some rather good jokes along the way! With help from prestigious experts, including Professors Richard Bauckham, John Polkinghorne and David Wilkinson, the author tackles issues such as the relationship between Christian belief and science, faith and suffering, the reliability of the Bible, the uniqueness of Jesus, the evidence for his resurrection, and the extent to which we can 'prove' the existence of God. Once again John Young has succeeded in combining a transparent faith, spirituality and earthed theology. What is more is that he has done so having obviously listened carefully to the voices of vague belief, half belief and unbelief. He presents us with a tour de force, surrounding his own presentation with a gallery of famous people's quotations. The lightness of touch, humour, and helpful subtitles make it all very accessible. A book to read, keep on the shelves and one to give friends. The Rt Revd Martin Wallace, The Bishop of Selby Addresses many major objections to the Christian faith ... a classic which we often recommend on Alpha. Nicky Gumbel (commenting on the previous edition)... compelling reading. Mike Pilavachi of Soul Survivor (commenting on the previous edition) Pressestimmen 'A classic' -- CPAS 'Quite first class' -- Bishop Hugh Montefiore 'This book does much to set the record straight and to demonstrate that, far from being in conflict, Christian faith goes hand in hand with reason, common sense, and historical fact.' -- Cliff
