Von Mary Griffith : The Unschooling Handbook: How to Use the Whole World As Your Child's Classroom (Prima Home Learning Library) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Unschooling Handbook: How to Use the Whole World As Your Child's Classroom (Prima Home Learning Library):

KundenrezensionenHilfreichste Kundenrezensionen2 von 2 Kunden fanden die folgende Rezension hilfreich. Whole world should return to unschoolingVon Esther van der WerfI had heard of homeschooling before, but not of unschooling. Having read the book, and the comments in it from unschooling parents and children, the latter is definitely what I would choose for any children of mine. Tell you what, after reading it I wished I had been 'unschooled'! Unfortunately, I haven't, however, I reckon with my kids, whenever they come along, I can make up for

a lot of what I've missed, by learning alongside them. I'm looking forward to that opportunity! The book is excellent in that it not only clearly explains the concept of unschooling, it also gives practical examples of how the children get an interest in learning to read, how mathematics and science are included in every day life, how history and the arts become wonderful day trips to museums, etc. On top of all that it has a chapter on 'coping with doubts and challenges', and each chapter has a long list of reference books where more info can be found. In short, a real gem. The whole world should return to unschooling I think. I highly recommend it.1 von 1 Kunden fanden die folgende Rezension hilfreich. Excellent boost for your self confidence as a home educatorVon Ein KundeIf you have any doubts about your family's ability to reap the benefits of homeschooling, please read this book. All fears will be put to rest. Should they creep up again, grab this book AGAIN and read!!0 von 0 Kunden fanden die folgende Rezension hilfreich. As a 16 year old I have found this book to be inspirationalVon Ein KundeI am currently a junior in high school, and I have been looking for an alternative to public schooling for over a year. This book provides a lot of helpful background information on how to get started and continue with your unschooling. The whole idea behind unschooling is a very creative and revolutionary way to improve the current education system. I would highly recommend this book to any adult looking to better their child's learning experience as well as to any child who, like myself, has felt that they have been unchallenged by the public schooling system.

KurzbeschreibungTo Unschoolers, Learning Is As Natural As BreathingDid you know that a growing percentage of home schoolers are becoming unschoolers? The unschooling movement is founded on the principle that children learn best when they pursue their own natural curiosities and interests. Without bells, schedules, and rules about what to do and when, the knowledge they gain through mindful living and exploration is absorbed more easily and enthusiastically. Learning is a natural, inborn impulse, and the world is rich with lessons to be learned and puzzles to be solved.Successful unschooling parents know how to stimulate and direct their children's learning impulse. Once you read this book, so will you!From the Trade Paperback edition..deUnschooling, a homeschooling method based on the belief that kids learn best when allowed to pursue their natural curiosities and interests, is practiced by 10 to 15 percent of the estimated 1.5 million homeschoolers in the United States. There is no curriculum or master plan for allowing children to decide when, what, and how they will learn, but veteran homeschooler Mary Griffith comes as close as you can get in this slim manual. Written in a conversational, salon-style manner, The Unschooling Handbook is liberally peppered with anecdotes and practical advice from unschoolers, identified by their first names and home states. The book also includes resources such as one teenager's sample "transcript," a typical weekly log of a third-grader's activities, and helpful lists of magazines, online mailing lists, Web sites, and catalogs. Griffith, a board member of the Homeschool Association of California (and the author of The Homeschooling Handbook), names Margaret Mead and Thomas Edison as two examples of those who have profited from unschooled childhoods, and further claims that research validates support for this controversial form of education. The "evidence" she cites, however, is predominantly theoretical writings from noted educators about the benefits of child-centered learning. The handbook suffers from a mild case of the Lake Wobegone syndrome--every unschooled children is seen as an above-average self-starter on the verge of genius--yet despite this overly rosy approach, the book is a well-organized guide for homeschoolers and other families contemplating the "un" life. --Jodi Mailander Farrell.comUnschooling, a homeschooling method based on the belief that kids learn best when allowed to pursue their natural curiosities and interests, is practiced by 10 to 15 percent of the estimated 1.5 million homeschoolers in the United States.
