symbolism, fact, fantasy ... and MJ magic Von Dr. Karen Moriarty As the author of *Defending A King ~ His Life Legacy* about the incomparable Michael Jackson, I approached this book by Donna Massa-Chappee with enthusiasm and excited anticipation. I was not disappointed! Ms. Massa-Chappee and I have experienced similar, strong, and complex emotional reactions and a special level of affinity with Michael Jackson ever since his untimely and tragic death in 2009. A life-changing event for both of us, we each felt compelled to write about MJ, to pay him tribute, to honor him, and to contribute to his legacy. Donna has added another dimension, however. She has expressed so much in this book through her twelve hand-drawn illustrations, each rich with symbolism, fantasy elements, and representations from MJ's life and his loves. Her heartfelt book combines Michael Jackson, art, spirituality, symbolism, facts and fantasy. MJ the consummate artist would appreciate and love this book. Ms. Massa-Chappee captures the magic of Michael Jackson in her illustrations and in her writing as she intertwines her own experience with his and also projects us into the future. She assures us that MJ will continue to heal the world via his vision, legacy, example, and inspiration. The author presents to her reader MJ's story and his untold story, an aspect of this book that makes it unique. The author uses her talents as an artist, designer, and illustrator to inform, inspire, and explain the mysteries of what was to come if Michael had lived, what he wanted us to know, and most importantly, to share the true meaning of his legacy with the world and the many generations to come. Of the approximately 500 books about Michael Jackson, I believe that this one is truly different: it uses art to portray MJ the artist; it combines fact with fantasy; and it unabashedly projects MJ into the future that he did not live to enjoy. It helps us to honor him. Kudos to the author!
