Narnia, but instead of kings and queens people are worthless. What I didn't expect was a beautiful story about friendship that is stronger than habits, preconceptions and a humongous difference in height. This book shows perfectly that not our race or our appearance define who we are, but our actions. The guy who seems to be the good one, the protector at first turns out to be a person with a huge lack of humanity. Whereas the big monster is a very decent and caring person and a great friend. In this book you will be thrown into a world not that much different than ours, except for the fact that everything is enormous. The story will most definitely make you rethink the relationship to your pet. It made me do it at least. What disturbed me a little though was the hint of a romance between the two main characters. To me that was not really appropriate. But all in all I can really recommend it to everyone, who doesn't like the usual YA-books with their love triangles and partly transparent plots. Even though I knew some parts of the book were going to happen before, I didn't think they would happen like they did, at the point of time they did. The cliffhanger in the end makes me believe that this is going to be the prelude of a series, but maybe the author just wanted it to be an open end and leave it to our imagination to finish the story.

Kurzbeschreibung A world no one would believe. From the moment Lyris is treated to coffee by a beautiful stranger, she has no idea that her life is about to change forever. In her enthusiasm to start at a new school with a new boyfriend, Lyris is almost able to look past his oddities. Almost. The way he eyes up her striking red hair. The way he loves that she's seventeen. The perfect age. And the way he's gone from all but begging to show her a specific room in a specific house to making her swear never to even think about it again. When Lyris doesn't take his strange warnings seriously, she finds that nothing could have prepared her for what lay behind that door. Suddenly, Lyris finds herself in a world no one would believe. A world where she's only a few inches tall and giants aren't creatures from fairy tales. Where humans are no longer the dominant race, but pets auctioned off to the highest bidder. Lyris understands the true danger of such a place, but there seems to be one person on her side. Her kind and surprised captor. And while Brindt appears to be sweet and trustworthy, he also straddles the line between seeing her as an equal and a cute animal. Lyris has to get home before the one person can turn to become the one person who can't let her go. To Nowhere is a YA dystopian novel that forces readers to ask what gives one person the right to keep another. Author C.E. Wilson has watched every episode of The Twilight Zone and it shows in her writing. Buy To Nowhere today to read a dystopian where the one person you need to trust may be the one who can't let you go.
