Kundenrezensionen Hilfreichste Kundenrezensionen 1 von 1 Kunden fanden die folgende Rezension hilfreich. Absolut lesenswert! Von Friedrich Plesken Das beste Buch von Neale Donald Walsch, das ich nach den Gesprächen mit Gott

bisher gelesen habe. Natürlich ist die "Spiritualität der Zukunft" nicht mit dem lesenden Intellekt alleine zu begreifen, aber selbst für diesen eine außerordentlich intelligente Annäherung an den nächsten Schritt - gewissermaßen die Leiter, von der Wittgenstein schreibt, dass man auf ihr hinaufsteigt, um sie dann hinter sich zu lassen.

Kurzbeschreibung Something extraordinary is about to happen on this planet. Humanity is about to create a new form of spirituality. This New Spirituality will allow humans to express their natural impulse toward the Divine without making one another wrong for the way in which they are doing it, and without killing one another in the name of it. When the New Spirituality is embraced by humanity, it will, of course, change everything. And that is exactly what is needed now. This book contains an astonishing prediction. And that prediction comes from an astonishing source. Author Neale Donald Walsch says it comes directly from God. Whether you believe that or not, you will find it difficult not to be swept up in the startling and profound vision of our near future contained here. Tomorrow's God says, point-blank, that humanity will soon re-create its experience of God in such a way that our experience of one another will be healed at last. You may agree or disagree with the contents of this book, but you will never forget having read it.

From Publishers Weekly The author of the Conversations with God series writes another "dialogue" between two voices on the subject of who God is and how the human understanding of God makes a difference in choices and behavior. Walsch writes candidly that "very little here cannot be found, cumulatively, in the sacred writings of all the world's wisdom traditions," as he retells the life story of the Buddha and insists on the divinity of Jesus Christ. Yet, he continues, in much the same way a more traditional theologian would, humans "have not been listening." His objection is to a God made in the image of humanity that has justified violence and exclusivity. The alternative he proposes is an immanent process rather than a super being who demands allegiance. For Walsch, this "expanded view" of God and spirituality engenders improvements in human institutions. The second half of the book imagines practical applications based on a utopian world in which this new spirituality reigns. Chapters envision changed relationships, sex, politics and education, and Walsch even speculates about a cash-free future society in which there will be no mandatory taxation. Walsch is consistent in the concerns throughout his dozen-plus books and speaks simply about great questions of purpose, peace and happiness that haunt humanity.

From Booklist The Conversations with God guy is back, with more conversations with God. As he cautioned in *The New Revelations* (2002), so he cautions here: he doesn't have much new to say. Still, "you might find . . . a New You. And a way to create a New World." Half of this book retreads the turf trod in *New Revelations*, which, you'll recall, had to do with junking the old, judgmental God in favor of the God that really is--a divinity who never asks for anything, doesn't care how you connect with Him, doesn't operate in terms of right and wrong but in terms of what works and what doesn't, communicates all the time, and never damns anyone or lets anybody die. The other half is called "The Fourth Transformation," and God assures us it's inevitable. He points up in boldface what this transformation will bring, such as "your presently established religions will stop fighting with each other," and "the idea that politics and spirituality do not mix will be abandoned forever." Hmmm. Isn't that what happens in a perfected Christian or Islamic society, anyway? God/Walsch isn't about to deliquesce into Christianity or Islam, however, for He also bold-facedly predicts, "Your presently established religions will stop declaring that something can exist outside of God." Those who believe that creator and creation are distinct probably should be discouraged from reading even that far.
