philosophy for real menVon Ein KundeThis isn't another book which tries to explain life (and death, religion, love, etc.) from a logical point of view. This a book written for men who live, suffer, love and get drunk sometimes. In other words, you don't have to have read a lot of philosophy before, you just have to live in this world, with its everyday

troubles. If you like to read quality books, this is the one I recommend.0 von 0 Kunden fanden die folgende Rezension hilfreich. understandable philosophyVon Ein KundeThis book will answer your questions about the significance of life if there are answers. Some examples of his ideas: Belief in UFOs and a divinity are similar to the extent that there is another consciousness out there. Beware of believing in something that we all so desperately want to believe! Infinity and finiteness are both absurd notions if you ponder them a bit- if the Universe is infinite then how did it start. If it is finite then what happened just before it started? Our brains are simply limited. Fascinating stuff about the relationship between love and death! If you read one more book before you die- let it be this one.0 von 0 Kunden fanden die folgende Rezension hilfreich. thank heavens for a passionate philosophy...Von Craig Chalquist, PhD, author of TERRAPSYCHOLOGY and DEEP CALIFORNIA...and a passionate philosopher who can write! It's here: the verdancy of flowers, the whiff of a woman's fine perfume....well, not exactly those, but an immense hunger for attachment to the world in which we actually live and a yearning for more, for more...I love his assessment of Descartes and his rationalist ilk: "I think, therefore I am a thinker..."
