Wahnsinnig gute Bilder!!!Von -KundeNicht nur die Auswahl der Motive, sondern auch die Momentaufnahmen zeigen den guten Blick des Fotografen, die Situation vor Ort einzufangen und in den Bildern lebendig darzustellen!TOP!

Kurzbeschreibung 15687 people lost their lives, 2906 are still missing, 470 square kilometers of landscape were flooded and 130436 homes were completely destroyed. These are the tragic facts of the Tohoku-Earthquake, that occurred in March 2011 off the Japanese coastline and set off a tsunami that reached up to 38 meter. One year later, photographer Moritz Roeder travelled to the devastated and radioactively contaminated provinces of northern Japan and came back with dramatic and very impressive images from the disaster zone. This book combines more than 150 images of the catastrophic events, the demolition and reconstruction of Japan with further facts and infographics about the tsunami, its origins and the extent of destruction it caused.
